Profile Summary

Backend-focused software engineer with 4+ years of experience building RESTful APIs and scalable microservices using **Java, Spring Boot, and Node.js**. At PTC, worked on **Arbortext Content Delivery** (REST services, utilities, **OpenSearch**-based search, multi-IdP **SSO**) and now build **FMEA** and **CAPA** modules for the **Windchill QMS** team. Strong in **MySQL, PostgreSQL**, and system performance optimization, with prior full-stack experience in **Angular/React** and **GenAI/OpenAI API** integrations.

Experience

Software Specialist Nov 2025 – Present
PTC *Pune, India*

- Developing **FMEA** and **CAPA** modules for **Windchill QMS** as part of the Windchill Quality Management team.
- Built **RESTful APIs** and upgraded existing utilities for **Arbortext Content Delivery** (ACD), migrating the legacy **C++** architecture to **Java** and **Spring Boot** microservices.
- Reduced data loading time by **40–50%** through the microservices redesign, replacing the legacy **C++** system.
- Worked on the ACD **Search** service built on **OpenSearch**, enabling context-dependent content retrieval across the platform.
- Enhanced **ACD SSO** from **PingFederate**-only support to a configurable layer in **Spring Boot** that works with any identity provider (IdP).

Software Engineer Aug 2022 – Nov 2025
Xoriant *Pune, India*

- Led development of an internal **Appraisal Portal** using **Node.js, Express, MySQL, and Angular**, streamlining performance review workflows for 4,000+ employees.
- Designed and implemented RESTful APIs for user, evaluation, and report modules with JWT-based authentication.
- Collaborated with frontend teams using **Angular** and **React** for seamless integration and component-based UI design.
- Implemented scalable microservices in **Node.js** for event reminders, analytics, and document workflows.
- Enhanced internal tools with **OpenAI API** integrations, enabling automated content summarization and generation.

Technical Skills

Languages: JavaScript (ES6+), TypeScript, Python, Java
Backend: Node.js, Express.js, Spring Boot
Frontend: Angular, React, HTML5, CSS3, Redux, RxJS
Databases: MySQL, PostgreSQL, MongoDB
DevOps/Tools: Docker, Git, Jenkins, Postman

Education

Walchand Institute of Technology Solapur, India
Bachelor of Technology in Computer Science and Engineering (9.83 CGPA) *Aug 2018 – Jul 2022*

Projects

FaunaFind | *Node.js, MySQL, Angular, Redis*

- Rebuilt an image search application backend using **Node.js** and **Express**, improving response time by 40%.
- Integrated an **Angular** dashboard for metadata management and search results visualization.
- Implemented caching with Redis for frequently accessed queries, improving throughput under high load.
